

## IBCH PAS SEMINARS (October 2024 – June 2024)

| Date              | Department   | Head                    |
|-------------------|--|-------------------------|
| 02.10.2023        | Department of Structural Bioinformatics                      | M. Szachniuk            |
| 09.10.2023        | Department of Molecular and Systems Biology                  | M. Figlerowicz          |
| 16.10.2023        | Department of Biomolecular NMR                               | Z. Gdaniec              |
| 23.10.2023        | Department of Chemistry of Nucleic Acid Components           | M. Sobkowski            |
| 30.10.2023        | Department of Plant Molecular Physiology                     | M. Jasiński             |
| 06.11.2023        | Department of Molecular Genetics                             | P. Kozłowski            |
| 13.11.2023        | Conference ‘Understand and describe life’                    | ---                     |
| 20.11.2023        | Department of RNA Structural Genomics                        | E. Kierzek              |
| <b>27.11.2023</b> | <b>Department of Molecular Medicine, Cornell University</b>  | <b>Sachi Ichikawa</b>   |
| 04.12.2023        | Department of Plant Functional Metabolomics                  | P. Bednarek             |
| 11.12.2023        | Department of Structure and Function of Biomolecules         | W. Rypniewski           |
| 18.12.2023        | Xmas break   | ---                     |
| 08.01.2024        | Department of Ribonucleoprotein Biochemistry                 | A. Kurzyńska-Kokorniak  |
| 15.01.2024        | Department of Nucleic Acids Bioengineering                   | A. Pasternak            |
| 22.01.2024        | Department of Computational Biology<br>of Non-coding RNA     | B. Uszczyńska-Ratajczak |
| 29.01.2024        | Department of Structural Biology of Eukaryotes               | M. Ruszkowski           |
| 05.02.2024        | Department of Structural Biology<br>of Prokaryotic Organisms | K. Brzeziński           |
| 12.02.2024        | Department of Medical Biotechnology                          | A. Fiszer               |
| 19.02.2024        | Winter break   | ---                     |
| 26.02.2024        | Department of Biopolymer Chemistry                           | M. Chmielewski          |
| 04.03.2024        | Department of Rare Diseases                                  | M. Wojciechowska        |

|            |  |                             |
|------------|--|-----------------------------|
| 11.03.2024 | Department of Plant Genomics                                       | A. Żmieńko                  |
| 18.03.2024 | Department of Genome Engineering                                   | M. Olejniczak               |
| 25.03.2024 | Department of RNA Metabolism                                       | Z. Warkocki                 |
| 08.04.2024 | Department of Molecular Neurobiology                               | M. Figiel                   |
| 15.04.2024 | Department of Molecular Neurooncology                              | K. Rolle                    |
| 22.04.2024 | Department of Non-coding RNAs                                      | M. Piwecka                  |
| 29.04.2024 | Department of Biomedical Proteomics                                | M. Łuczak                   |
| 06.05.2024 | Department of Molecular Probes and Drugs                           | J. Kolanowski               |
| 13.05.2024 | Department of RNA Structure and Function                           | K. Pachulska-Wieczorek      |
| 20.05.2024 | Department of Functional Transcriptomics                           | K. Grzywacz                 |
| 27.05.2024 | Department of Molecular Virology                                   | P. Zmora                    |
| 03.06.2024 | Department of Structural Chemistry<br>and Biology of Nucleic Acids | R. Kierzek                  |
| 10.06.2024 | Department of Medical Biology                                      | M. Naskręt-<br>Barciszewska |
| 17.06.2024 | Department of Neuronal Cells Biology                               | P. Świtoński                |
| 24.06.2024 | Department of Cancer Genetics                                      | K. Klonowska                |
